Project title: NDMC Phase II: Developing Models to Estimate and Project Disease Burden to Inform Control and/or Elimination Strategies for Priority Diseases in India

About the project: IIT Bombay is the lead institution of the National Disease Modelling Consortium (NDMC). The consortium partners with various institutions across the country for disease modelling research. The consortium aims to develop India-specific disease models to address policy and programmatic questions, to improve disease control and intervention strategies in the country. More information about the consortium can be found at www.ndmconsortium.com

Essential Qualifications & Experience:

PhD in Engineering / MTech/ME/MDes or equivalent degree **with minimum 3 years** relevant experience/ BTech/BE/BDes or equivalent engineering degree with minimum 5 years of experience

OR

PhD in Sciences with minimum 2 years relevant experience / MSc or MPH with 5 years experience

Job Profile:

- Support IITB faculty and researchers in their scientific communication requirements
- Clearly communicate scientific results in a condensed, non-technical, jargon free language that is understandable to non-specialist audiences and decision-makers
- Develop and understanding of disease areas in focus
- Demonstrate the flexibility necessary to function across different disease areas
- Write original content for publication activities (primary manuscript, abstracts, posters) slide presentations and other materials based on research content provided by IITB faculty
- Provide graphics support
- Prepare newsletters communicating research updates as needed
- Participate in meetings with healthcare system stakeholders

Pay Details: Consolidated salary 78,000+HRA (if applicable) p.m.
